Ram Gupta Ghaziabad, Uttar Pradesh 6397857733 | ramgupta1906@gmail.com | LinkedIn | Github |Portfolio

Summary

Final-year B.Tech Computer Science and Engineering student with strong fundamentals in Data Structures and Algorithms. Hands-on experience in developing academic and personal projects focused on responsive web interfaces, user-centric experiences, and practical software solutions. Actively seeking Software Engineering opportunities with an interest in frontend development to apply problem-solving skills and gain practical software development experience.

Skills

- **Programming Languages:** Java, Python (Basic)
- **Data Structures & Algorithms:** Arrays, Strings, Linked Lists, Searching & Sorting, Stack, Queue, Recursion
- **Core CS Subjects:** OOP(Fundamentals)
- **Web Technologies:** HTML, CSS, React.js
- **Backend & Database:** Spring Boot, PostgreSQL
- **Tools:** Git, GitHub, VS Code, Canva, Netlify
- **Soft / Professional Skills:** Problem Solving, Communication, Teamwork, Adaptability

Academic Projects

Edusphere – College Portal Website | GitHub | Demo

Developed a responsive college portal website for students and teachers with a focus on structured layouts and easy navigation.

Technologies Used: HTML, CSS

- Designed and developed responsive web pages for an improved user experience across different screen sizes.
- Improved usability, readability, and overall user experience through clean and structured interface design.

JobTrack AI | GitHub | Demo

Developed and deployed a full-stack job application tracking platform that helps students and job seekers manage applications, assessments, interviews, and resumes through a centralized dashboard.

Technologies Used: React, JavaScript, HTML, CSS, Java, Spring Boot, PostgreSQL

- Developed a responsive dashboard with CRUD functionality for applications, assessments, interviews, and career activity.
- Implemented secure JWT authentication and REST APIs with Spring Boot, Spring Security, and PostgreSQL.
- Deployed the frontend on Vercel and backend on Render, with PostgreSQL hosted on Supabase.

RAAH – Telemedicine Platform

Developed a prototype telemedicine platform featuring symptom guidance and teleconsultation workflows to improve healthcare accessibility in rural areas.

Technologies Used: Java

- Implemented Java-based logic for processing user inputs and providing symptom-based guidance.
- Focused on creating a simple and organized workflow for healthcare assistance.

Virtual Experience / Training

Data Structures & Algorithms Training — GeeksforGeeks

- Completed structured training in Data Structures and Algorithms.
- Practiced problem-solving techniques through coding exercises covering fundamental DSA concepts.

Introduction to Software Engineering Job Simulation — Commonwealth Bank | Forage

- Developed and styled a responsive webpage using HTML and CSS, following specified branding guidelines.
- Prepared a web-hosting proposal addressing hosting options and website security considerations.

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering
Raj Kumar Goel Institute of Technology, Ghaziabad
Expected Graduation: 2027 | CGPA: 7.9/10

Achievements & Activities

- Solved **300+ Data Structures and Algorithms problems** on **LeetCode**.
- Participated in **Smart India Hackathon (SIH)** as a team member.
- Secured **3rd Position** in the **CSI Hackathon**.
- Authored a **research paper** on **RAAH (Telemedicine Platform)**, selected for presentation at an **International Conference**.
- Participated in **AINCAT 2026 (All India Naukri Campus Aptitude Test).**

Extra Curricular/ Volunteer Activities

- Active member of the **Departmental Newsletter Team**, contributing to content preparation and basic design support.
