

Summary

B.Tech Computer Science and Engineering student (3rd year) with strong fundamentals in **data structures and algorithms**. Hands-on experience in developing **academic projects** using **Java** and **web technologies**. Actively seeking internships to apply problem-solving skills and enhance practical software development experience.

Skills

- **Programming Languages:** Java, Python(Basic)
- **Data Structures & Algorithms:** Arrays, Strings, Linked Lists, Searching & Sorting, Stack, Queue
- **Core CS Subjects:** OOP(Fundamentals)
- **Web Technologies:** HTML, CSS
- **Tools:** Git, GitHub, VS Code
- **Soft / Professional Skills:** Communication, Problem Solving, Teamwork, Adaptability

Academic Projects

RAAH – Telemedicine Platform

Developed a prototype telemedicine platform featuring symptom guidance and teleconsultation workflows to improve healthcare accessibility in rural areas.

Technologies Used: Java

- Implemented Java-based logic for processing user inputs and generating symptom-based guidance workflows.
- Designed structured data handling mechanisms for managing patient information and consultation records.

Edusphere – College Portal Website | [GitHub](#) | [Demo](#)

Developed a responsive college portal web interface for students and teachers with a focus on structured layouts and easy navigation.

Technologies Used: HTML ,CSS

- Designed and implemented responsive page layouts and UI components for improved accessibility and user interaction.
- Improved usability, readability, and overall user experience through clean and structured interface design.

SANAI

Developed a healthcare monitoring system concept focused on tracking and managing hospital-acquired infections.

Technologies Used: Python

- Contributed to workflow planning, dashboard design ideas, and alert system concepts for infection monitoring and response management

Virtual Experience / Training

Data Structures & Algorithms Training

GeeksforGeeks | Ongoing

- Currently undergoing structured training in Data Structures and Algorithms.
- Strengthening problem-solving skills through hands-on coding practice.

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering

Raj Kumar Goel Institute of Technology, Ghaziabad

Expected Graduation: 2027 | CGPA: 8.1/10

Achievements & Activities

- Solved 120+ **DSA problems** on LeetCode and **140+ DSA problems** on GeeksforGeeks.
- Participated in **Smart India Hackathon (SIH)** as a team member
- Secured **3rd Position** in **CSI Hackathon**
- Authored a **research paper on RAAH (Telemedicine Platform)** focusing on digital healthcare solutions, selected for presentation at an international conference
- Participated in **AINCAT 2026** (All India Naukri Campus Aptitude Test).

Extra Curricular/ Volunteer Activities

- Active member of the **Departmental Newsletter Team**, contributing to content preparation and basic design support.
- Member of **Nebula technical society**
